## Preface

This document contains information about the 08.08.01.00R08 version of the BAT-C2 operating system. See also the corresponding ReadMe document for additional information.

## Known Issues

### Router Mode

The following issue applies for the use case the BAT-C2 device is configured to route traffic between the networks attached to the Ethernet and WLAN interfaces and a static IP address is configured on the WLAN interface.

In case there the BAT-C2 loses its connection of the WLAN link, the device might no longer be reachable via its IP address on the Ethernet interface. As a consequence the forwarding of packets fails via the routed interface.

This issue can be mitigated by using a dynamic IP assignment for the WLAN link.

### Roaming

During a roaming event a user might experience a higher packet loss than expected.

### System

The reset to factory-default via pressing the "Reset-button" is not indicated by the System-LED. Still the reset is executed after pressing the button for 6 seconds or longer.

## **Software Version 08.08.01.00R08**

- The Software Version 08.08.01.00R08 is a bug fix release for the BAT-C2, which improves the long-term stability of the device.

## **Software Version 08.02.01.03R09**

- The Software Version 08.02.01.03R09 is the first release for the BAT-C2 device.  
All features and functions of the BAT-C2 device are described in detail in the BAT-C2 user manual.

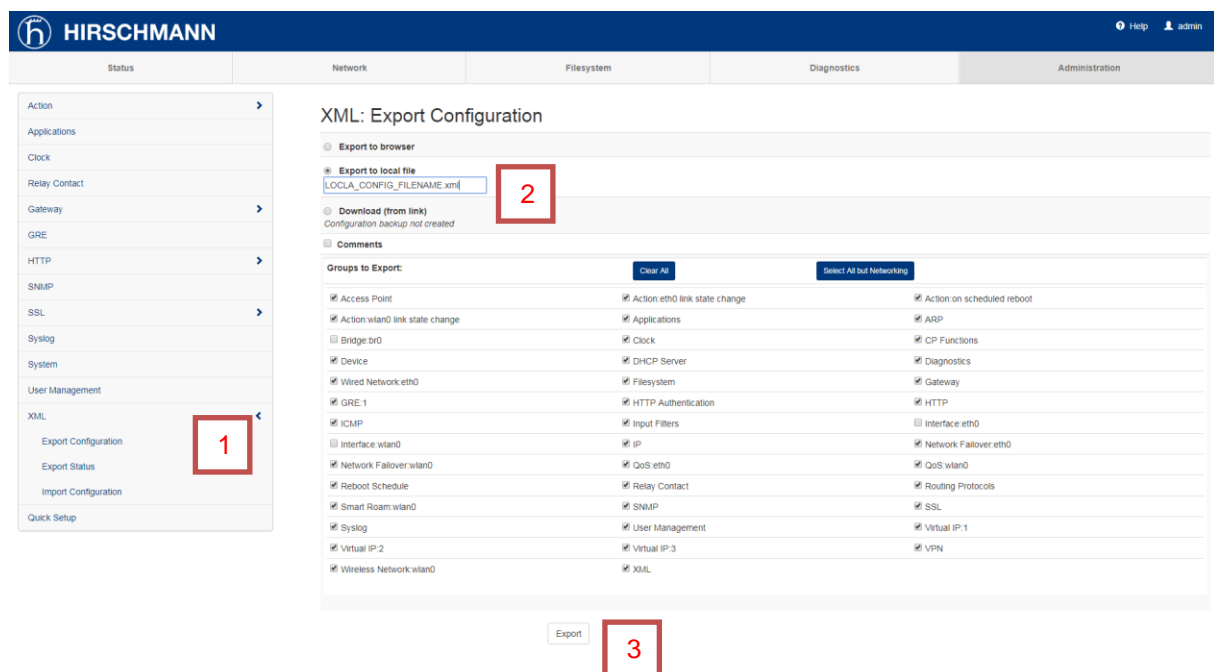

## Comments

### Default login to the web interface of the BAT-C2

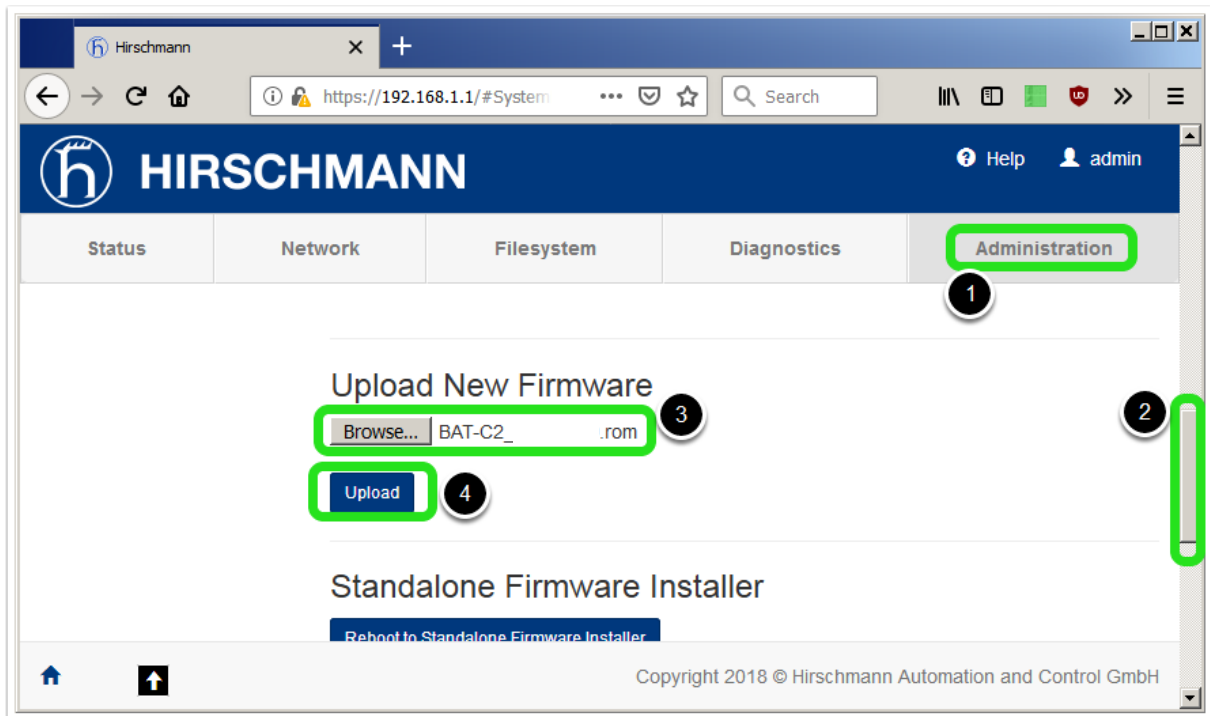

- If you connect the first time to your **BAT-C2**, enter the default IP address 192.168.1.1/24 (on the BAT-C2 ETH port) in your web browser.
- The default username/password is admin/private.

### Update of the BAT-C2 Software

- Prior to a Software update, back up the **BAT-C2** configuration file using the web interface with:
  1. Navigate to “Administration” -> “XML” -> “Export Configuration”
  2. Choose “Export to local file” and assign a local file name file
  3. Press “Export”

- After that step, load the new BAT-C2 operating system into your device with using the web interface with:
  1. Navigate to “Administration”
  2. Under “Upload New Firmware” choose binary FW to be uploaded
  3. Press “Upload”

## **Licenses**

### **Copyright of Integrated Software**

#### **Open Source Software used in the product**

The product contains, among other things, Open Source Software files, as defined below, developed by third parties and licensed under an Open Source Software license. These Open Source Software files are protected by copyright. Your right to use the Open Source Software is governed by the relevant applicable Open Source Software license conditions.

Your compliance with those license conditions will entitle you to use the Open Source Software as foreseen in the relevant license. In the event of conflicts between other Hirschmann Automation and Control GmbH license conditions applicable to the product and the Open Source Software license conditions, the Open Source Software conditions shall prevail. The Open Source Software is provided royalty-free (i.e. no fees are charged for exercising the licensed rights). Open Source Software contained in this product and the respective Open Source Software licenses are stated below.

If Open Source Software contained in this product is licensed under GNU General Public License (GPL), GNU Lesser General Public License (LGPL), Mozilla Public License (MPL) or any other Open Source Software license, which requires that source code is to be made available and such source code is not already delivered together with the product, you can order the corresponding source code of the Open Source Software from Hirschmann Automation and Control GmbH - against payment of the shipping and handling charges - for a period of at least 3 years since purchase of the product. Please send your specific request, within three years of the purchase date of this product, together with the name and ID number of the product to be found at the label of the product to:

Hirschmann Automation and Control GmbH  
Head of R&D  
Stuttgarter Strasse 45-51  
72654 Neckartenzlingen  
Germany

## **Warranty regarding further use of the Open Source Software**

Hirschmann Automation and Control GmbH provides no warranty for the Open Source Software contained in this product, if such Open Source Software is used in any manner other than intended by Hirschmann Automation and Control GmbH. The licenses listed below define the warranty, if any, from the authors or licensors of the Open Source Software. Hirschmann Automation and Control GmbH specifically disclaims any warranty for defects caused by altering any Open Source Software or the product's configuration. Any warranty claims against Hirschmann Automation and Control GmbH in the event that the Open Source Software contained in this product infringes the intellectual property rights of a third party are excluded.

The following disclaimer applies to the GPL and LGPL components in relation to the rights holders:

"This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License and the GNU Lesser General Public License for more details."

For the remaining open source components, the liability exclusions of the rights holders in the respective license texts apply.

Technical support, if any, will only be provided for unmodified software.

## **Software contained in the product**

You can find the detailed list of used Open Source Software and its license terms in the user manual under the leafing chapter ***"Open Source Information"***

Further the detailed list of used Open Source Software is available in the Web-Interface under:
